Subject index*

A

Acid-base homeostasis, basic mechanisms involved in, 239
status, blood-gas analysis and assessment of, 247
Activity, physical, in rehabilitation of patients following myocardial infarction. I. Basis of early ambulation, 317
Airflow in endotracheal and tracheostomy tubes, effect of airway diameter, suction catheters, and bronchofiberscope on, 235
Airway diameter, suction catheters, and bronchofiberscope, effect of, on airflow in endotracheal and tracheostomy tubes, 235
Alimentation in injured and septic patients, 791
Ambulation, early, basis of. Physical activity in rehabilitation of patients following myocardial infarction. I, 317
American Association of Critical-Care Nurses. News and announcements, 21, 202, 369, 547, 704, 865
Officers, directors, and chapters, 167
Position paper, 693
President's message, 19, 191, 361, 537, 689, 859
Staff report, 201, 366, 543, 694, 862
bicentennial, remembrances of: enduring words in cardiology and critical care, 563
Anaerobic infections, 406
Antiarrhythmic drugs, physiologic bases for use of. Arrhythmias in coronary-care unit. VI, 496
Antibiotic resistance and sepsis, increasing incidence of, 593
Anticoagulants, current practice in use of, for ischemic heart disease: survey of 200 hospitals, 742
Antihypertensive agent, new: clonidine (Catapres), 457
Antimicrobial therapy: some guidelines, 437
Arrhythmia(s), cardiac, tuberous sclerosis presenting with, 964
complicating acute myocardial infarction: self-teaching program, 576
in coronary-care unit. IV. Physiologic bases of paroxysmal tachycardia-dependent bundle branch block, 139
V. Physiologic bases of paroxysmal bradycardia-dependent bundle branch block, 322
VI. Physiologic bases for use of antiarrhythmic drugs, 496
ventricular, treatment of: evaluation of standard therapy and recent advances, 485
Artery and capillary wedge pressures, pulmonary, in noncritically ill patients, effect of body position upon, 83
Asbestos—useful and dangerous, 482
Asthma and cromolyn sodium: problem in clinical research, 71
Atrioventricular junction, electrocardiographic recognition of Wenckebach phenomenon in sites other than, 747
A-V block, intermittent pseudocomplete, due to A-V dissociation in presence of 2:1 A-V block, 462
pseudo. Part I, 815
Part II, 978
study in, 633
junctional rhythm, study in, 971

B

Bacteremia and endotoxemia: discussion of roles in pathophysiology of gram-negative sepsis, 765
Beats, reciprocal, initiated by artificial pacemaker, 124
Bicentennial, American, remembrances of: enduring words in cardiology and critical care, 563
Bigeminy, ventricular pseudo-, due to sustained myoclonus, 961
Block, A-V, study in, 633
exit, Wenckebach type of, double-atrial and ventricular tachycardia with, 313
intermittent pseudocomplete A-V, due to A-V dissociation in presence of 2:1 A-V block, 462
paroxysmal bradycardia-dependent bundle branch, physiologic bases of. Arrhythmias in coronary-care unit. V, 322
tachycardia-dependent bundle branch, physiologic bases of. Arrhythmias in coronary-care unit. IV, 139
pseudo A-V. Part I, 815
Part II, 978
second-degree sino-atrial, sinus rhythm complicated by, 137
Blood, amount of, withdrawn for diagnostic tests in critically ill patients, 933
gas analysis and assessment of acid-base status, 247
interpretations, arterial, in respiratory intensive-care unit, 256
pressure and heart rate of patients in coronary-care unit, effects of family visits on, 291
Body position, effect of, upon pulmonary artery and pulmonary capillary wedge pressures in noncritically ill patients, 83
Breathing, positive-pressure, effect of, on arterial oxygen tension in patients with chronic obstructive pulmonary disease receiving oxygen therapy, 449
Bronchofiberscope, airway diameter, and suction catheters, effect of, on airfow in endotracheal and tracheostomy tubes, 235
Bundle branch block, paroxysmal bradycardia-dependent, physiologic bases of. Arrhythmias in coronary-care unit. V, 322
tachycardia-dependent, physiologic bases of. Arrhythmias in coronary-care unit. IV, 139
recordings, His: contribution to understanding of human electrophysiology, 907

*January-February, pp. 1-172; March-April, pp. 173-342; May-June, pp. 343-518; July-August, pp. 519-672; September-October, pp. 673-838; November-December, pp. 839-1016.

C

Cancer and colonic polyps, attack on—colonoscopy, 973
Capillary and artery wedge pressures, pulmonary, in noncritically ill patients, effect of body position upon, 83
Cardiac arrhythmia, tuberous sclerosis presenting with, 964
rehabilitation, inpatient, eight steps to: team effort—methodology and preliminary results, 97
scintigraphy, effects of medical and surgical therapy on myocardial perfusion in coronary disease evaluated by, 808
transplantation: eight years' experience, 566
Cardioactive drugs, use of, in acute myocardial infarction, 44
Cardiology, applications in. Ultrasound in medical diagnosis. Part I, 895
and critical care, enduring words in: remembrances of American bicentennial, 563
nuclear, in evaluation of therapy and ventricular function in ischemic heart disease, 641
Cardiopulmonary complications of Guillain-Barré syndrome, 967
resuscitation, complications of, 805
Cardiovascular changes in sepsis, 772
Carotid sinus pressure, idionodal tachycardia "abolished" by, 461
syncope, 453
Catapres (clonidine): new antihypertensive agent, 457
Catheters, suction, airway diameter, and bronchofiberscope, effect of, on airflow in endotracheal and tracheostomy tubes, 235
CCRN, CEU's, and CERP's . . . . future of critical-care nursing (Staff report), 201
CERP's, CEU's, and CCRN. . . . future of critical-care nursing (Staff report), 201
CEU's, CERP's, and CCRN . . . . future of critical-care nursing (Staff report), 201
Choking, food-, death from, prevented by new life-saving maneuver, 755
Clonidine (Catapres): new antihypertensive agent, 457
Colonic polyps and cancer, attack on—colonoscopy, 973
Colonoscopy—attack on colonic polyps and cancer, 973
Committee care, continuity or (Staff report), 366
Congestive heart failure in infant, 62
Contagious illnesses, management of patients with, 596
Convention Director, AACN, comments from (Staff report), 694
Coronary arterial occlusive disease, significance of ST-segment changes in detection of: maximal-stress, multiple-lead exercise testing, 91
disease, effects of medical and surgical therapy on myocardial perfusion in, evaluated by cardiac scintigraphy, 808
Countershock, direct-current, delayed conversion to sinus rhythm after, 465
Cromolyn sodium and asthma: problem in clinical research, 71
Cuff deflation, hourly, effectiveness of, in minimizing tracheal damage, 734

D

Death from food-choking prevented by new life-saving maneuver, 755
with dignity (President's message), 19
Decannulation of tracheostomized patient, 119
Digitalis excess mimicking sick sinus syndrome, 652
Director, AACN Convention, comments from (Staff report), 694
Disease, chronic obstructive pulmonary, patients with, receiving oxygen therapy, effect of positive-pressure breathing on arterial oxygen tension in, 449
coronary arterial occlusive, significance of ST-segment changes in detection of: maximal-stress, multiple-lead exercise testing, 91
effects of medical and surgical therapy on myocardial perfusion in, evaluated by cardiac scintigraphy, 808
ischemic heart, current practice in use of anticoagulants for: survey of 200 hospitals, 742
nuclear cardiology in evaluation of therapy and ventricular function in, 641
single, it's not—turista, 636
tubulo-interstitial—injured kidney, 799
Drugs, antiarrhythmic, physiologic bases for use of. Arrhythmias in coronary-care unit. VI, 496
cardioactive, use of, in acute myocardial infarction, 44

E

Editor, new nurse, of HEART AND LUNG, 41
Electrocardiographic monitoring, new approaches to—trend recording, 225
recognition of Wenckebach phenomenon in sites other than atrioventricular junction, 747
trend recording, clinical application of, 267
Electrophysiology, human, contribution to understanding of: His bundle recordings, 907
Embolism, pulmonary fat: complication of fracture, 477
Emergencies, hypertensive, clinical management of, 571
Endocrine changes in sepsis, 411
Endotoxemia and bacteremia: discussion of roles in pathophysiology of gram-negative sepsis, 765
Endotracheal, cuffed, or tracheostomy tube, tracheal damage and prolonged intubation with, 733
and tracheostomy tubes, effect of airway diameter, suction catheters, and bronchofiberscope on airflow in, 235
Exercise testing, maximal-stress, multiple-lead: significance of ST-segment changes in detection of coronary arterial occlusive disease, 91

F

Family visits, effect of, on blood pressure and heart rate of patients in coronary-care unit, 291
Fat embolism, pulmonary: complication of fracture, 477
Feminism, attitudes, and nursing careers (Staff report), 543
Food-choking, death from, prevented by new life-saving maneuver, 755
Fracture, complication of: pulmonary fat embolism, 477
Function, ventricular, and therapy in ischemic heart disease, nuclear cardiology in evaluation of, 641

G

Gram-negative sepsis, discussion of roles in pathophysiology of: bacteremia and endotoxemia, 765
Griffith, George C., M.D., 1898-1975—America's beloved clinician, 42

Guillain-Barré syndrome, cardiopulmonary complications of, 967

H

Heart disease, ischemic, current practice in use of anticoagulants for: survey of 200 hospitals, 742
nuclear cardiology in evaluation of therapy and ventricular function in, 641
failure, congestive, in infant, 62
rate and blood pressure of patients in coronary-care unit, effect of family visits on, 291
Hemodynamic effects, renal, of sepsis, 777
Hepatobiliary complications of sepsis, 621
His bundle recordings: contribution to understanding of human electrophysiology, 907
Homeostasis, acid-base, basic mechanisms involved in, 239
Hospital-acquired infections, surveillance and management of, 784
Human electrophysiology, contribution to understanding of: His bundle recordings, 907
Hypercalcemic crisis, acute, 624
Hypertensive emergencies, clinical management of, 571

I

Infant, congestive heart failure in, 62
Infarction, acute myocardial, arrhythmias complicating: self-teaching program, 576
use of cardioactive drugs in, 44
myocardial, physical activity in rehabilitation of patients following. I. Basis of early ambulation, 317
Infection(s), anaerobic, 406
control in intravenous therapy, 430
hospital-acquired, surveillance and management of, 784
opportunistic, 601
pulmonary, 611
surveillance, practical approach to, in intensive care unit, 788
of urinary tract, diagnosis and treatment of, 607
Injured kidney—tubulo-interstitial disease, 799
and septic patients, alimentation in, 791
Injuries to major vessels: overview of current concepts, 301
Interval, anomalous P-R, singular case of, 803
Intra-abdominal sepsis, 781
Intracranial pressure, increased: update, 919
monitoring, description and uses of, 277
Intravenous therapy, infection control in, 430
Intubation, prolonged, with cuffed endotracheal or tracheostomy tube, tracheal damage and, 733
Ischemic heart disease, current practice in use of anticoagulants for: survey of 200 hospitals, 742
nuclear cardiology in evaluation of therapy and ventricular function in, 641
limb, acutely, 273
Issues in critical care, current (President's message), 537
we face, the, 985

J

Junction, atrioventricular, electrocardiographic recognition of Wenckebach phenomenon in sites other than, 747
Junctional rhythm, A-V, study in, 971

K

Kidney, injured—tubulo-interstitial disease, 799

L

Learning for tomorrow, 731
Letters to editors, 150, 328, 504, 658, 820, 992
Life-saving maneuver, new, death from food-choking prevented by, 755
Limb, acutely ischemic, 273

M

Management and nursing, critical-care (Staff report), 862
Mechanical ventilation, 939
complications occurring during, 112
weaning patient from, 228
Metabolism during shock and sepsis, 416
Microorganisms frequently causing sepsis, classification of, 397
Myocardial infarction, acute, arrhythmias complicating: self-teaching program, 576
use of cardioactive drugs in, 44
physical activity in rehabilitation of patients following. I. Basis of early ambulation, 317
perfusion in coronary disease, effects of medical and surgical therapy on, evaluated by cardiac scintigraphy, 808
Myoclonus, sustained, ventricular pseudo-bigeminy due to, 961
Myoglobinuria, 950

N

News and announcements, 21, 202, 369, 547, 704, 865
Nuclear cardiology in evaluation of therapy and ventricular function in ischemic heart disease, 641
Nurse editor, new, of HEART AND LUNG, 41
Nursing careers, feminism, and attitudes (Staff report), 543
critical-care: reflections and forecasts (President's message), 361
and management, critical-care (Staff report), 862

O

Opportunistic infections, 601
Oxygen tension, arterial, in patients with chronic obstructive pulmonary disease receiving oxygen therapy, effect of positive-pressure breathing on, 449

P

Pacemaker, artificial, reciprocal beats initiated by, 124
Patient care, prevention of fragmentation of: coordinative role of critical-care nurse (Position paper), 693
Pedagogical crisis, acute . . . critical-care intervention (President's message), 191
Perfusion, myocardial, in coronary disease, effects of medical and surgical therapy on, evaluated by cardiac scintigraphy, 808
Phenomenon, Wenckebach, electrocardiographic recognition of, in sites other than atrioventricular junction, 747
Polyps, colonic, and cancer, attack on—colonoscopy, 973
Positive-pressure breathing, effect of, on arterial oxygen tension in patients with chronic obstructive pulmonary disease receiving oxygen therapy, 449

P-R interval, anomalous, singular case of, 803
President's message, 689
acute pedagogical crisis . . . critical-care intervention, 191
critical-care nursing: reflections and forecasts, 361
current issues in critical care, 537
death with dignity, 19
Is anyone there? Does anyone care?, 859
Pressure(s), carotid sinus, idionodal tachycardia "abolished" by, 461
increased intracranial: update, 919
monitoring, intracranial, description and uses of, 277
pulmonary artery and capillary wedge, in noncritically ill patients, effect of body position upon, 83
Program, self-teaching: arrhythmias complicating acute myocardial infarction, 576
Pulmonary artery and capillary wedge pressures in noncritically ill patients, effect of body position upon, 83
disease, chronic obstructive, patients with, receiving oxygen therapy, effect of positive-pressure breathing on arterial oxygen tension in, 449
fat embolism: complication of fracture, 477
infections, 611

Q

Questions and answers, 146

R

Recordings, His bundle: contribution to understanding of human electrophysiology, 907
Rehabilitation, inpatient cardiac, eight steps to: team effort—methodology and preliminary results, 97
of patients following myocardial infarction, physical activity in. I. Basis of early ambulation, 317
Renal hemodynamic effects of sepsis, 777
Respiratory failure, acute, treatment and diagnosis of, in sepsis, 614
intensive-care unit, arterial blood-gas interpretations in, 256
Resuscitation, cardiopulmonary, complications of, 805
Reviews of books and audio-visual teaching material, 153, 336, 508, 660, 826, 1004
Rhabdomyosarcoma, metastatic, of heart, 127
Rhythm, A-V junctional, study in, 971
sinus, complicated by second-degree sino-atrial block, 137
Role, coordinative, of critical-care nurse: prevention of fragmentation of patient care (Position paper), 693

S

Scintigraphy, cardiac, effects of medical and surgical therapy on myocardial perfusion in coronary disease evaluated by, 808
Sclerosis, tuberous, presenting with cardiac arrhythmia, 964
Segment changes, ST-, significance of, in detection of coronary arterial occlusive disease: maximal-stress, multiple-lead exercise testing, 91
Sepsis and antibiotic resistance, increasing incidence of, 593
brief introduction to: importance and some historical notes, 393
cardiovascular changes in, 772

Sepsis—Cont'd
classification of microorganisms frequently causing, 397
diagnosis and treatment of acute respiratory failure in, 614
endocrine changes in, 411
gram-negative, discussion of roles in pathophysiology of: bacteremia and endotoxemia, 765
hepatobiliary complications of, 621
intra-abdominal, 781
renal hemodynamic effects of, 777
severe, and septic shock, diagnosis and management of, 422
and shock, metabolism during, 416
Wayne State University Symposium, 393, 593, 765
Septic and injured patients, alimentation in, 791
shock and severe sepsis, diagnosis and management of, 422
Shock and sepsis, metabolism during, 416
septic, and severe sepsis, diagnosis and management of, 422
Sino-atrial block, second-degree, sinus rhythm complicated by, 137
Sinus pressure, carotid, idionodal tachycardia "abolished" by, 461
rhythm complicated by second-degree sino-atrial block, 137
delayed conversion to, after direct-current countershock, 465
syncope, carotid, 453
syndrome, sick, digitalis excess mimicking, 652
ST-segment changes in detection of coronary arterial occlusive disease, significance of: maximal-stress, multiple-lead exercise testing, 91
Surgical and medical therapy, effects of, on myocardial perfusion in coronary disease evaluated by cardiac scintigraphy, 808
Syncope, carotid sinus, 453
Syndrome, Guillain-Barré, cardiopulmonary complications of, 967
sick sinus, digitalis excess mimicking, 652

T

Tachycardia, double-atrial and ventricular, with Wenckebach type of exit block, 313
idionodal, "abolished" by carotid sinus pressure, 461
ventricular—often physician makes it worse, 143
Teaching program, self-: arrhythmias complicating acute myocardial infarction, 576
Testing, maximal-stress, multiple-lead exercise: significance of ST-segment changes in detection of coronary arterial occlusive disease, 91
Tests, diagnostic, amount of blood withdrawn for, in critically ill patients, 933
Tetanus, physiological and psychological aspects of: report of case, 297
still therapeutic challenge, 226
Tracheal damage, effectiveness of hourly cuff deflation in minimizing, 734
and prolonged intubation with cuffed endotracheal or tracheostomy tube, 733
Tracheostomized patient, decannulation of, 119
Tracheostomy or cuffed endotracheal tube, tracheal damage and prolonged intubation with, 733

Tracheostomy—Cont'd
and endotracheal tubes, effect of airway diameter, suction catheters, and bronchofiberscope on airflow in, 235
Tract, urinary, diagnosis and treatment of infections of, 607
Transplantation, cardiac: eight years' experience, 566
Tube(s), cuffed endotracheal or tracheostomy, tracheal damage and prolonged intubation with, 733
endotracheal and tracheostomy, effect of airway diameter, suction catheters, and bronchofiberscope on airflow in, 235
Tubulo-interstitial disease—injured kidney, 799
Turista—it's not single disease, 636
T-wave, giant, 314

U

Ultrasound in medical diagnosis. Part I. Applications in cardiology, 895
Unit, coronary-care, arrhythmias in. IV. Physiologic bases of paroxysmal tachycardia-dependent bundle branch block, 139
V. Physiologic bases of paroxysmal bradycardia-dependent bundle branch block, 322
VI. Physiologic bases for use of antiarrhythmic drugs, 496

Unit, coronary-care—Cont'd
effect of family visits on blood pressure and heart rate of patients in, 291
intensive care, practical approach to infection surveillance in, 788
respiratory intensive-care, arterial blood-gas interpretations in, 256
Urinary tract, diagnosis and treatment of infections of, 607

V

Ventilation, mechanical, 939
complications occurring during, 112
weaning patient from, 228
Ventricular pseudo-bigeminy due to sustained myoclonus, 961
Vessels, major, injuries to: overview of current concepts, 301

W

Wave, giant T-, 314
Wayne State University Symposium—sepsis, 393, 593, 765
Wenckebach phenomenon, electrocardiographic recognition of, in sites other than atrioventricular junction, 747
type of exit block with double-atrial and ventricular tachycardia, 313
Wrongs, two, sometimes make a right, 493
